INTRODUCTION

You can give a brief description of the topic you want to talk about here. For example, if you want to talk about Mercury, you can say that it’s the smallest planet in the entire Solar System.
OBJECTIVES

You can describe the topic of the section here
BACKGROUND

**MERCURY**
It’s the closest planet to the Sun

**VENUS**
Venus is the second planet from the Sun

**MARS**
Mars is actually a very cold place

**JUPITER**
Jupiter is the biggest planet of them all

**SATURN**
It’s composed of hydrogen and helium

**NEPTUNE**
It’s the farthest planet from the Sun
AWESOME WORDS

MERCURY
It’s the closest planet to the Sun and the smallest one in the Solar System.

VENUS
Venus has a beautiful name and is the second planet from the Sun.

MARS
Despite being red, Mars is actually a cold place. It’s full of iron oxide dust.

A PICTURE ALWAYS REINFORCES THE CONCEPT

Images reveal large amounts of data, so remember: use an image instead of a long text. Your audience will appreciate it.

CONCLUSIONS

Venus has a beautiful name and is the second planet from the Sun. It’s terribly hot, even hotter than Mercury, and its atmosphere is extremely poisonous. It’s the second-brightest natural object in the night sky after the Moon.
